

Dangerous Heat Possible Late This Week

Forecast Maximum Heat Index Friday

Weather Message of the Day:

- Hot and humid conditions are likely this week with a period of potentially **dangerous** heat Thursday through Saturday. Heat indices of 105 to 110 are possible.
- Highest confidence in dangerous heat along and south of Interstate 90. Thunderstorm activity may impact temperatures, especially farther north.

Important Forecast Changes

Excessive Heat Watch Issued for northeast Iowa and southwest Wisconsin for late this week.

NEW

Dangerous Heat Possible Late This Week

Key Points

Hazards, Timing and Duration: **Dangerous Heat/humidity.** Daily afternoon heat indices of 90 to 100. Potential for high temperatures of 95 to 100 degrees and heat indices of 105 to 110 Thursday through Saturday. Low temperatures may remain in the mid 70s to low 80s in some areas late week.

Areas Impacted: Hot and humid conditions expected area wide this week with the highest temperatures and heat indices most likely from the Interstate 90 corridor southward. An Excessive Heat Watch has been issued for Thursday to Saturday for northeast Iowa and southwest Wisconsin.

Confidence: Periodic thunderstorms may impact the magnitude of heat. Confidence in excessive heat is lower farther north late this week, especially north of Interstate 90.

Impacts: Heat-related impacts can occur in as little as 30 minutes. Exposure to this heat for several days is particularly dangerous for the young and elderly, as well as pets!

Excessive Heat Watch: Thur-Sat

Weather Message of the Day:

A hot and humid week is expected with potential for dangerously hot temperatures and heat indices late this week (Thursday-Saturday). The dangerous heat appears most likely near and south of the Interstate 90 corridor. **Prepare now for dangerous heat this week - plan to limit outdoor exposure and stay hydrated.**

Practice HEAT SAFETY Wherever You Are

Heat related deaths are preventable.
Protect yourself and others from the impacts of heat waves.
